PUBLIC SAFETY ADVISORY

Apple AirTag Tracking Devices: Safety and Awareness

The Nassau County Police Department would like to raise awareness about illegal use of Apple AirTags. Apple AirTags are tracking devices intended to be used to locate keys, purses, backpacks, and other small personal items. They can be easily placed anywhere due to their small size, with battery life lasting up to a year. Apple AirTags work best through connecting to a Bluetooth signal on your iPhone and also have the capability to track items from great distances.

In the wrong hands, these tracking devices can be misused for criminal purposes like tracking vehicles or individuals, their location and/or their belongings for harmful purposes.

If you are being tracked, your iPhone should alert you with a notification saying "AirTag Found Moving With You." Android phone users will need to download the Apple Tracker Detect App to receive this type of alert.

Keep yourself and your belongings safe:

- If you're alerted that an Airtag is in your vicinity, or you think someone may be following you, immediately call 911.
- If you are an Android phone user, download the Apple Tracker Detect app and manually scan your surrounding area to get any potential AirTag alert notifications.

Be Alert! If you see something, say something!

Call 911 for emergencies or crimes in progress
Crime Stoppers 1-800-244-TIPS
